Here are steps and screenshots for creating (or verifying settings for) the ODBC connection for MobileAsset v7. Use the settings in the screenshots unless specified otherwise.

64-bit Windows: Use Windows File Explorer to find and run this program:

C:\Windows\SysWOW64\odbcad32.exe

Note: Do not use Data Sources (ODBC) from Administrative Tools, since it will not work for 32-bit applications.

32-bit Windows: Start, Control Panel, Administrative Tools, Data Sources (ODBC)

Both: Click the System DSN tab.

If you see a source called MobileAsset with driver SQL Native Client, click Configure, then skip ahead to "For the SQL Server field".

If the MobileAsset source is not there, click Add.

	< Back Finish Cancel	

For the SQL Server field, specify your SQL server name and SQL instance name in this form: SERVERNAME\INSTANCENAME

If you don't have an instance, don't include the backslash or instance name: SERVERNAME

Click Next.

Microsoft SQL Server DSN Configuration				
Microsoft <sup>®</sup> SQLServer 2005	This wizard will help you create an ODBC data source that you can use to connect to SQL Server. What name do you want to use to refer to the data source? Name: MobileAsset			
How do you want to describe the data source? Description: MobileAsset Datasource Which SQL Server do you want to connect to? Server: VM-SKIRCHER-2\WASPDBEXPRESS
